.....

Future Desired States

For Each of the Above Present Triggers how would the client like to feel, act or behave instead?

Socially	Work/Community	Close Relationships

Phase 8: Reevaluation

Check for what the client experienced between sessions:

- Assess if the client processed more between sessions.
- Changes in symptoms
- Changes in behaviors or patterns of relating
- Changes in reactivity or previous triggers
- Dreams
- New thoughts or insights

Reevaluate the Target from last session. “ *Do you remember what we worked on last time?*”

Assess the current state of the previous target:

- Is it still disturbing?
- Were other associated memories brought up?
- Were the present triggers more or less active?
- Remember, incomplete session can be incomplete for phases 4, 5, 6.

If INCOMPLETE, Restart Phase 4 Reprocessing by asking:

“What is the image that is the worst part of this memory now?”

“What emotions are you feeling now?”

“On a scale of 0- 10, how disturbing does that feel to you now?”

“Bring up that memory, notice where you feel that disturbance in your body, and follow my fingers.”

Continue sets of DAS, as if you are starting in top of Phase 4, until you get to a 0, then move on to Phases 5-7.

If COMPLETE: Go to the next memory in chronological order

and process Phases 3-7.

that still has a charge, by taking a SUD,

Phase 3: Assessment Full Protocol

Specific Instructions: Prior to starting, please make sure you are incorrect the seating, have already practiced speed, distance and type of DAS, and practiced the stop signal. *You should be ready to start eye movements after the final question in Assessment*

Target: (In training, earliest touchstone memory found. This should be a moment in time, not an issue.) _____

"When you bring up that memory, what image represents the worst part?" _____

ONLY if no image (may be another perception of the five senses): *"As you think of the experience, what is the worst part of it?"* _____

Negative Cognition: *"What words go best with that picture that express your negative belief about yourself now?"* _____

Positive Cognition: *"When you bring up that picture, what would you prefer to believe about yourself instead?"* _____

Validity of Cognition (VOC): *"When you think of that picture, how true do those words (repeat the positive cognition above) feel to you now on a scale of 1 to 7, where 1 feels completely false and 7 feels completely true?"*

1 2 3 4 5 6 7

Completely False

Completely True

Emotion: *"When you bring up that picture and those words (negative cognition above), what emotion do you feel now?"* _____

SUD: *"On a scale of 0 to 10, where 0 is no disturbance or neutral and 10 is the highest disturbance you can imagine, how disturbing does the memory feel to you now?"*

0 1 2 3 4 5 6 7 8 9 10

No disturbance/neutral

Highest disturbance

Location of Body Sensation: *"Where do you feel it in your body?"* _____

"I'd like to invite you to bring up that picture, those negative words (repeat the negative cognition) , and notice where you are feeling it in your body—and follow my fingers."

(DAS generally 20 or more passes/customized to need of client.)

Important!! After the following question, you immediately start DAS and are in PHASE 4. (Turn to next page.

Phase 4: Reprocessing

A

DESENSITIZATION:

After the DAS/BLS of 20-30 back and forth, *"What are you noticing now?"* Allow them to answer, and no matter what they say, you say: *"Go with that."* Then do another set of DAS, generally 20 or more passes that are customized to the needs of the client.

Repeat: *"What are you noticing now? Go with that."* Continue DAS/BLS as long as the client reports change or new information (as many sets of DAS/BLS as necessary) until the client stops reporting change for two consecutive sets of DAS/BLS, then ask (B).

?

B

BACK TO TARGET:

"When you go back to the original memory, what are you noticing now?" (Pause for a response.) *"Go with that."* (DAS, 20 or more passes customized to the client).

Repeat: *"What are you noticing now?"* (Pause for a response) *"Go with that."* (Sets of DAS). Continue with sets of DAS as long as client reports change or new information (as many sets of DAS as necessary).

When the client goes back to the original target after two consecutive sets of DAS and still reports no change check SUD (see C below).

C

CHECK SUD:

When you believe they are at or near end of processing, say *"When you bring up the original memory, on a scale of 1 to 10, where 0 is no disturbance and 10 is the highest disturbance you can imagine, how disturbing does it feel to you now? ---Go with that."* (Sets of DAS). If SUD is stuck at 1 or 2, ask, *"Where do you feel it in your body? ____ Go with that."* Set(s) of DAS or, *"What is the most disturbing part of that memory now?"*

REPEAT Steps A, B, and C until SUD is 0 twice (or ecologically sound).

Phase 5: Installation

Installation links the desired Positive Cognition with the original memory/experience:

7

"Do the words (repeat the PC) still fit, or is there another positive statement you feel would be more suitable?"

8

"Think about the memory and those words 7, (repeat the selected PC). From 1, completely false, to completely true, how true do they feel?"

9

"Hold them together. Those words _____ and that memory. " Do DAS.

10

"On a scale of 1 to 7, how true do the words (PC) _____ feel to you now?" (After each set)

11

Continue installation as long as the material is becoming more adaptive. Continue sets of DAS until the VOC no longer strengthens. Once the VOC=7 (or ecological), go to Phase 6: Body Scan.

12

If client reports a 6 or less, check appropriateness and address blocking belief (if necessary) with additional sets of DAS. (Note: If running out of time, set aside the blocking belief to be addressed at a later time and proceed to closure for incomplete session.)

Phase 6: Body Scan

“Close your eyes and keep in mind the original memory and the words (repeat the selected Positive Cognition). Then bring your attention to the different parts of your body, starting with your head, and working downward. Any place you find any tension, tightness or unusual sensation, tell me.”

If any sensation is reported, do DAS. If there is a positive/comfortable sensation, do DAS to strengthen the positive feeling. If a sensation of discomfort is reported, reprocess until discomfort subsides.

Savoring the New!
After a clear Body Scan: *“Is there a gesture or movement that would help you connect with that feeling of _____ (name the PC or new positive feeling)?”*

Phase 7: Closure

An unfinished session is one in which a client's material is still unresolved (i.e., s/he is still obviously upset; the SUD has not gone down to 0; the VOC has not gone up to 7; you have not had time to complete the Body Scan).

The following is a procedure for closing down an unfinished session. The purpose is to acknowledge clients for what they have accomplished and assist them in being present and as stable as possible prior to leaving.

*** Procedure for closing unfinished sessions*** If complete go directly to #3.

1

Give the client the reason for stopping. *"We are almost out of time and we will need to stop soon."* Give encouragement and support for the effort made. *"You have done some very good work and I appreciate the effort you have made. What feels like the most important thing you have learned about yourself or for yourself today?"*

2

Do a containment exercise: *"I suggest we do a resource (or a container) exercise before we stop. I suggest we _____"* Suggest resource you have practiced or a container exercise. Examples include: Container imagery (put it away in a container until the next session); Safe/Calm Place; Light Stream; etc.

3

Read the "Debrief the Experience" section to the client, as scripted below:

Closure for all Sessions: *"The processing we have done today may continue after the session. You may or may not notice new insights, thoughts, memories, or dreams. If so, just notice what you are experiencing and if you wish you can record it on the Memories & Lies log. Use the resources we have worked on to help manage any disturbance. We can work on this material next time. If necessary, you can call me."*

FUTURE TEMPLATE SCRIPT

We choose one of the future desired states relating to the present triggers to focus on, these can be found on the Treatment Plan Targets Sheet. Identify how the client would like to respond instead of the current response to the present triggers. Together with the client choose which present trigger/future template will be addressed.

Say: “We have addressed the past events, the root of the present disturbance as well as the present triggers and now we will look at what you would like to be different in the future. We have a specific protocol to imagine your desired future and process blocks and enhance and deepen the positive states.”

“I would like you to run a movie of the desired state and the words (PC)..... Imagine stepping into this scene, noticing how you are handling the situation. Notice what you are thinking feeling and experiencing in your body. Let me know when you are ready and I will begin BLS and you can let me know when to stop.”

After the movie stops check in with client and get feedback. Repeat 3 to 5 times.

Once the movie is successfully installed above, invite the client to create a challenge or a bump in the road to add to the movie. It may be something the client is afraid might happen.

The clinician may suggest something if the client has a difficult time coming up with one.

Ask: “What if....(future fear)... were to happen during this experience?”

“What resources might be helpful for you to be able to see this movie where you are effectively coping in this situation?”

Say: “I’d like you to imagine yourself coping effectively with/in in the future. I’d like to invite you to imagine running the movie, with the new positive belief (PC)..... and your resources. Notice how you are handling the situation and what you are thinking, feeling and noticing in your body”

If the client needs more resources you can help them with that before starting the BLS.

“Now I’d like to invite you to run this movie in your mind’s eye while we are doing the BLS. Let me know when you are ready to start and when to stop the BLS. We will check in afterwards.”

Run the movie 3 to 5 times with BLS- as long as it is getting more positive.

Final Step-Closure
(At the end of any session)

“The processing we have done today may continue after the session. You may or may not notice new insights, thoughts, memories or dreams. If so, just notice what you are experiencing and if you wish you can record it on the Memories & Lies Log. Use the resources we have worked on to help manage any disturbance. We can work on this material next time.”

If incomplete session add: “What do you need to be able to close today?” Or “I wonder if it would be helpful to.....(recommend a resource).”
